

# COULD MY INTERNAL IT STAFF BENEFIT FROM EXTERNAL SUPPORT?

## QUESTIONS

- Is your IT team constantly facing a heavy load of day-to-day tasks?
- Has your company been affected by a cyber-attack or data breach recently?
- Are there projects that your IT team is eager to undertake but lacks the specialized expertise to do so?
- Do your IT staff spend more time handling problems than focusing on strategic initiatives?
- Has your business adopted new technologies that your IT team is excited to leverage but struggles to manage?
- Are you concerned about the costs and time involved in continuous upskilling of your IT staff?
- Does your IT team find it challenging to stay knowledgeable of the rapidly evolving cybersecurity landscape?
- Do you lack a comprehensive disaster recovery plan that your IT team feels confident in?
- Is your IT team stretched thin providing round-the-clock support and monitoring?
- Are you unable to measure the performance of your IT infrastructure, or unsatisfied with the results?

If you've answered 'yes' to any of these questions, consider a partnership with a managed IT and cybersecurity services provider like Spot Migration.
